HOW THE VACUUM TUBE CREATED THE AGE OF ELECTRONICS
BIBLIOGRAPHY & REFERENCES
Jonathan Allen jonathan.a@ieee.org

Tyne, Gerald E.J., *Saga of the Vacuum Tube*, Howard W. Sams & Co. 1977. Detailed history up to about 1930. Rather weak on theory.

Albert, Arthur L., *Electronics and Electron Devices*, Macmillan Co., 1956. Theory and technology, along with relevant history.

Reich, Herbert J., *Theory and Applications of Electron Tubes*, Mc-Graw-Hill, 1939. (Very strong on theory and technology)

Smith, F. L., editor, *The Radiotron Designer's Handbook* Fourth Edition 1954, Reproduced And Distributed By RCA Victor Division, Radio Corporation Of America, (Avail. Amazon)

Termann, Frederick Emmons, *Electronic and radio engineering*, McGraw-Hill electrical and electronic engineering series, 1955 (Avail. Amazon) (Terman wrote several books on electronics. He not only understands theory and practice, but he is an excellent writer who explains them clearly.)

RCA Receiving Tube Manual, RCA Corp.
Detailed data on receiving, special purpose, and picture tubes, with theory. Characteristics, pinout, curves
1975 ed. Online free: http://www.tubebooks.org/tubedata/RC30.pdf

GE Essential Characteristics (receiving, CRT, special purpose, includes a few application schematics (1973 ed . Online, free)
www.tubebooks.org/tubedata/ge_essential_characteristics.pdf

Other tube books at: http://www.vacuumtubeera.net/index.html

RCA, A Historical Perspective RCA publication
ttps://worldradiohistory.com/ARCHIVE-RCA/RCA-Engineer/RCA-A-Historical-Perspective-1919-1984.pdf Quite complete history of RCA from founding in 1919 until 1984. Strong pro-RCA bias.
